

WITH **GO ELECTRIC** BEHIND
THE METER, UTILITIES CAN...

Alleviate Peak Demand

Deliver Safer Power

Optimize Clean Energy

Meet Demand Response Goals

Ask About Go Electric's **ZERO COST** Demand Response Solution

A POWERFUL PARTNER FOR UTILITIES

A QUICK GUIDE TO UTILITY-SIDE BENEFITS

Go Electric provides the first integrated solution for uninterruptible power, energy storage, and automated energy asset synchronization and optimization.

Customers ranging from military bases and hospitals to retailers and manufacturers are transformed into more predictable, efficient and self-sustaining grid agents.

LYNC SECURE® =
Uninterruptible Power
+ Energy Efficiency

Combines uninterruptible power, energy storage, microgrid controls, and automated power factor correction for peak shaving and load shifting to empower utility customers behind the meter

LYNC DR® =
LYNC Secure + Demand
Response Benefits

Provides all of the functionality of LYNC Secure and accelerates demand response enrollment by offering customers demand response-enabled solution *entirely free of cost.*

Meet Peak Demand

Automated peak shaving and load shifting reduce system-wide demand

Optimized Renewable Energy

Battery storage increases clean power availability

Safer Power Delivery

Minimal disruption and instability at sites with fragile grid connection

Smart Grid Interface

Monitoring, synchronization and microgrid functions for grid agents of any type

Increase Demand Response Enrollment

In applicable markets, customers receive demand response-enabled solution entirely free of cost
